

## Tritax Data Protection Policy

### **PURPOSE OF POLICY**

The Company stores and processes personal information about staff and other individuals. We need to deal with that data lawfully and our staff must help us to meet this obligation. This policy sets out how the Company (“we”, “our”, “us”) handles the Personal Data of our customers, suppliers, employees, workers and other third parties.

This policy applies to all Personal Data we process regardless of the media on which that data is stored or whether it relates to past or present employees, workers, customers, suppliers contacts, website users or any other Data Subject.

This policy applies to all Company Personnel (“you”, “your”). You must read, understand and comply with this policy when Processing Personal Data on our behalf and attend training as required on its requirements. This policy sets out what we expect from you in order for the Company to comply with applicable law. Your compliance with this policy is mandatory. Related Policies and Privacy Notices are available to help you interpret and act in accordance with this policy. You must also comply with all such Related Policies and Privacy Notices. Any breach of this policy may result in disciplinary action (for employees).

The policy (together with Related Policies) is an internal document and cannot be shared with third parties, including Customers and Suppliers without prior authorization from the Data Privacy Manager.

### **Key concepts**

**Automated Decision Making (ADM):** when a decision is made which is based solely on Automated Processing (including profiling) which produces legal effects or significantly affects an individual. The GDPR prohibits Automated Decision-Making (unless certain conditions are met) but not Automated Processing.

**Automated Processing:** any form of automated processing of Personal Data consisting of the use of Personal Data to evaluate certain personal aspects relating to an individual, in particular to analyse or predict aspects concerning that individual’s performance at work, economic situation, health, personal preferences, interests, reliability, behavior, location or movements. Profiling is an example of Automated Processing.

**Company Personnel:** all employees, workers contractors, casual or agency workers, consultants, officers, and others.

**Consent:** agreement which must be freely given, specific, informed and be an unambiguous indication of the Data Subject’s wishes by which they, by a statement or by a clear positive action, signifies agreement to the Processing of Personal Data relating to them.

**Data Controller:** the person or organisation that determines when, why and how to process Personal Data. It is responsible for establishing practices and policies in line with the GDPR. We are the Data Controller of all Personal Data relating to our Company Personnel and Personal Data used in our business for our own commercial purposes.

**Data Privacy Manager (DPM):** Caterine Fry, Compliance Officer, who is the Company's data privacy manager with responsibility for data protection compliance and be contacted via [Catherine.Fry@tritax.co.uk](mailto:Catherine.Fry@tritax.co.uk)

**Data Privacy Impact Assessment (DPIA):** tools and assessments used to identify and reduce risks of a data processing activity. DPIA can be carried out as a part of privacy by design and should be conducted for all major system or business change programs involving the Processing of Personal Data.

**Data Subject:** a living, identified or identifiable individual about whom we hold Personal Data. Data Subjects may be nationals or residents of any country and may have legal rights regarding their Personal Data.

**EEA:** the 28 countries in the EU, and Iceland, Liechtenstein and Norway

**Explicit consent:** consent which requires a very clear and specific statement (that is not just action)

**General Data Protection Regulation (GDPR):** the General Data Protection Regulation ((EU) 2016/679). Personal Data is subject to the legal safeguards specific in the GDPR.

**Personal Data:** any information identifying a Data Subject or information relating to a Data Subject that we can identify (directly or indirectly) from that data alone or in combination with other identifiers we possess or can reasonably access. Personal Data includes Sensitive Personal Data and Pseudonymised Personal Data but excludes anonymous data or data that has had the identity of an individual permanently removed. Personal data can be factual (for example, a name, email address, location or date of birth) or an opinion about that person's actions or behavior.

**Personal Data Breach:** any act or omission that compromises the security, confidentiality, integrity or availability of Personal Data or the physical, technical, administrative or organisational safeguards that we or our third party service providers put in a place to protect it. The loss, or unauthorised access, disclosure or acquisition, of Personal Data is a Personal Data Breach.

**Privacy by Design:** implementing appropriate technical and organisational measures in an effective manner to ensure compliance with the GDPR.

**Privacy Notices (also referred to as Fair Processing Notices) or Privacy Policies:** separate notices setting out information that may be provided to Data Subjects when the Company collects information about them. These notices may take the form of general privacy statements applicable to a specific group of individuals (for example, employee privacy notices) or they may be stand-alone, one time privacy statements covering Processing related to a specific purpose.

**Processing or Process:** any activity that involves the use of Personal Data. It includes obtaining recording or holding the data, or carrying out any operation or set of operations on the data including organising, amending, retrieving, using, disclosing, erasing or destroying it. Processing also includes transmitting or transferring Personal Data third parties.

**Pseudonymisation or Pseudonymised:** replacing information that directly or indirectly identifies as individual with one or more artificial identifiers or pseudonyms so that the person, to whom the data relates, cannot be identified without the use of additional information which is meant to be kept separately and secure.

**Sensitive Personal Data:** information revealing racial or ethnic origin, political opinions, religious or similar beliefs, trade union membership, physical or mental health conditions, sexual life, sexual orientation, biometric or genetic data, and Personal Data relating to criminal offences and convictions.

## SCOPE

All heads of Departments and Management are responsible for ensuring all Company Personnel comply with this Data Protection Policy or the GDPR or if you have any concerns that this policy is not being or has not been followed.

The DPM is responsible for overseeing this policy and, as applicable, developing Related Policies.

Please contact the DPM on with any questions about the operation of this policy or the GDPR or if you have any concerns that this policy is not being or has not been followed.

## PROCESSING PERSONAL DATA

As a business, we must ensure that when processing personal data (whether the data concerns the Company's employees or other individuals) we comply with the eight principles of good practice. These provide that personal data must be:

- Processed lawfully, fairly and a transparent manner (Lawfulness, Fairness and Transparency);
- Collected only for specified, explicit and legitimate purposes (Purpose Limitation);
- Adequate, relevant and limited to what is necessary in relation to the purposes for which it is processed (Data Minimisation);
- Accurate and where necessary kept up to date (Accuracy);
- Not kept in a form which permits identification of Data Subjects for longer than is necessary for the purposes for which the data is Processed (Storage Limitation);
- Processed in a manner that ensures its security using appropriate technical and organisational measures to protect against unauthorised or unlawful Processing and against accidental loss, destruction or damage (Security, Integrity and Confidentiality);
- Not transferred to another country without appropriate safeguards being in place (Transfer Limitation); and
- Made available to Data Subjects and Data Subjects allowed to exercise certain rights in relation to their Personal Data (Data Subject's Rights and Requests);

We are responsible for and must be able to demonstrate compliance with the data protection principles listed above (Accountability). More detailed guidance is set out below, but if you have any questions, you should ask the DPM.

## LAWFULNESS, FAIRNESS, TRANSPARENCY

### LAWFULNESS AND FAIRNESS

Personal data must be processed lawfully, fairly and in a transparent manner in relation to the Data Subject.

You may only collect, process and share Personal Data fairly and lawfully and for specified purposes. The GDPR restricts our actions regarding Personal Data to specified lawful purposes. These restrictions are not intended to prevent processing, but ensure that we process Personal Data fairly and without adversely affecting the Data Subject.

The GDPR allows processing for specific purposes, some of which are set out below:

- the Data Subject has given his or her consent;
- the Processing is necessary for the performance of a contract with the Data Subject;
- to meet our legal compliance obligations;
- to protect the Data subjects vital interests; or

- to pursue our legitimate interests for purposes where they are not overridden because the Processing prejudices the interests or fundamental rights and freedoms of Data Subjects. The purposes for which we process Personal Data for legitimate interests need to be set out in an applicable Privacy Notices or Fair Processing Notices.
- you must identify and document the legal ground being relied on for each Processing activity.

## CONSENT

A Data Controller must only process Personal Data on the basis of one or more of the lawful bases set out in the GDPR, which include Consent

- A Data subject consents to Processing of their Personal Data if they indicate agreement clearly either by a statement or positive action to the processing. Consent requires affirmative action, therefore silence, pre-ticked boxes or inactivity are unlikely to be sufficient. If consent is given in a document which deal with other matters, then the consent must be kept separate from those other matters.
- Data subjects must be easily able to withdraw consent to processing at any time and withdrawal must be promptly honoured. Consent may need to be refreshed if we intend to Process Personal Data for a different and incompatible, purpose which was not disclosed when the Data Subject first consented.
- Unless we can rely on another legal basis of processing, explicit consent is usually required for processing sensitive personal data, for automated decision-making and for cross border data transfers. Usually we will be relying on another legal basis (and not require explicit consent) to process most types of sensitive Personal Data. Where the explicit consent is required, we (you, on behalf of the company) must issue a fair processing notice to the Data subject to capture explicit consent.
- We will need to evidence Consent captured and keep records of all Consents so that the Company can demonstrate compliance with Consent requirements.

## TRANSPARENCY (NOTIFYING DATA SUBJECTS)

The GDPR requires Data Controllers to provide detailed, specific information to Data Subjects depending on whether the information was collected directly from Data Subjects or from elsewhere. Such information must be provided through appropriate Privacy Notices or Fair Processing Notices which must be concise, transparent, intelligible, easily accessible, and in clear and plain language so that a Data Subject can easily understand them.

Whenever we collect Personal Data directly from Data Subjects, including for human resources or employment purposes, we must provide the Data Subject with all the information required by the GDPR including the identity of the Data Controller and DPM, how and why we will use, Process, disclose, protect and retain that Personal Data through a Fair Processing Notice which must be presented when the Data Subject first provides the Personal Data.

When Personal Data is collected indirectly (for example, from a third party or publically available source), you must provide the Data Subject with all the information required by the GDPR as soon as possible after collecting/receiving the data. You must also check that the Personal Data was collected by the third

party in accordance with the GDPR and on a basis which contemplates our proposed processing of that Personal Data.

## **PURPOSE LIMITATION**

Personal Data must be collected only for specified, explicit and legitimate purposes. It must not be further processed in any manner incompatible with those purposes.

You (we) cannot use Personal Data for new, different or incompatible purposes from that disclosed when it was first obtained unless you (we) have informed the Data Subject of the new purposes and they have consented where necessary.

## **DATA MINIMISATION**

Personal Data must be adequate, relevant and limited to what is necessary in relation to the purposes for which it is processed.

You may only Process Personal Data when performing your job duties requires it. You cannot Process Personal Data for any reason unrelated to your job duties.

You may only collect Personal Data that you require for your job duties: do not collect excessive data. Ensure any Personal Data collected is adequate and relevant for the intended purposes.

You may ensure that when Personal Data is no longer needed for specific purposes, it is deleted or anonymised in accordance with the Company's data retention guidelines.

## **ACCURACY**

Personal Data must be accurate and, where necessary, kept up to date. It must be corrected or deleted without delay when inaccurate.

You will ensure that the Personal Data we use and hold is accurate, complete, kept up to date and relevant to the purpose for which we collected it. You must check the accuracy of any Personal Data at the point of collection and at regular intervals afterwards. You must take all reasonable steps to destroy or amend inaccurate or out-of-date Personal Data.

## **STORAGE LIMITATION**

Personal Data must not be kept in an identifiable form for longer than is necessary for the purposes for which the data is processed.

You must not keep Personal Data in a form which permits the identification of the Data Subject for longer than needed for the legitimate business purpose or purposes for which we originally collected it including for the purpose of satisfying any legal, accounting or reporting requirements.

The company will maintain retention policies and procedures to ensure Person Data is deleted after a reasonable time for the purposes for which it was being held, unless a law requires such data to be kept from a minimum tie. You must comply with the Company's guidelines on Data Retention.

You will take all reasonable steps to destroy or erase from our systems all Personal Data that we no longer require in accordance with all the Company's applicable records retention schedules and policies. This includes requiring third parties to delete such data where applicable.

You will ensure Data Subjects are informed of the period for which data is stored and how that period is determined in any applicable Privacy Notice or Fair Processing Notice.

## DATA SECURITY – INTEGRITY AND CONFIDENTIALITY

### PROTECTING PERSONAL DATA

We must ensure that appropriate technical and organisational security measures are taken against unlawful or unauthorised Processing of Personal Data, and against the accidental loss, destruction, damage to Personal Data.

We will develop, implement and maintain safeguards appropriate to our size, scope and business, our available resources, the amount of Personal Data that we own or maintain on behalf of others and identified risks (including use of encryption and Pseudonymisation where applicable). We will regularly evaluate and test the effectiveness of those safeguards to ensure security of our Processing of Personal Data. You are responsible for protecting the Personal Data we hold. You must implement reasonable and appropriate security measures against unlawful or unauthorised Processing of Personal Data and against the accidental loss of, or damage to, Personal Data. You must exercise particular care in protecting Sensitive Personal Data from loss and unauthorised access, use or disclosure.

**You must follow all policies, procedures and technologies we put in place to maintain the security of all Personal Data from the point of collection to the point of destruction. You may only transfer Personal Data to third-party service providers who agree to comply with the required policies and procedures and who agree to put adequate measures in place, as requested (see below).**

You must maintain data security which means, guaranteeing the confidentiality, integrity and availability of the personal data, defined as follows:

Confidentiality means that only people who have a need to know and are authorised to use the Personal Data can access it.

Integrity means that Personal Data is accurate and suitable for the purpose for which it is processed.

Availability means that authorised users are able to access the Personal Data when they need it for authorised purposes. Personal Data should therefore be stored on our central computer system instead of individual PCs.

**You must comply with and not attempt to circumvent the administrative, physical and technical safeguards we implement and maintain in accordance with the GDPR and relevant standards to protect Personal Data.**

### REPORTING A PERSONAL DATA BREACH

The GDPR requires Data Controllers to notify any Personal Data breach to the applicable regulator, the information Commissioners Office, and, in certain instances, the Data Subject.

We have put in place procedures to deal with any suspected Personal Data breach and will notify Data subjects or any applicable regulator where we are legally required to do so.

**If you know or suspect that a Personal Data Breach has occurred, do not attempt to investigate the matter yourself. Immediately contact the DPM which has been designated as the key point of contact for Personal Data Breaches. You should preserve all evidence relation to potential Personal Data Breach.**

### TRANSFER LIMITATION

The GDPR restricts data transfers to countries outside the EEA in order to ensure that the level of data protection afforded to individuals by the GDPR is not undermined. You transfer Personal Data originating

in one country across borders when you transmit, send, view or access that data in or to a different country.

You may only transfer Personal Data outside the EEA if one of the following conditions applies:

The European Commission has issued a decision confirming that the country to which we transfer the Personal Data ensures an adequate level of protection for the Data Subjects' rights and freedoms. Please see the EU's website for a list of these Countries – <https://ec.europa.eu/info/law/law-topic/data-protection>

Appropriate safeguards are in place such as binding corporate rules (BCR), standard contractual clauses approved by the European Commission, an approved code of conduct or a certification mechanism: please discuss this with the DPM:

The Data Subject has provided explicit consent to the proposed transfer after being informed of any potential risks; or

The transfer is necessary for one of the other reasons set out in the GDPR including the performance of a contract between us and the Data Subject, reasons of public interest, to establish, exercise or defend legal claims or to protect the vital interest of the Data Subject where the Data Subject is physically or legally incapable of giving consent and, in some limited cases, for our legitimate interest.

**You must not transfer personal data anywhere outside the EU without first consulting the DPM.**

## **DATA SUBJECT'S RIGHTS AND REQUESTS**

Data Subjects have rights when it comes to how we handle their Personal Data. These include rights to:

- withdraw consent to processing at any time;
- receive certain information about our processing activities;
- request access to their Personal Data that we hold;
- prevent our use of their Personal Data for direct marketing purposes;
- ask us to erase Personal Data if it is no longer necessary in relation to the purposes for which it was collected or processed or to rectify inaccurate data or to complete incomplete data;
- restrict processing in specified circumstances;
- challenge processing which has been justified on the basis of our legitimate interests or in the public interest;
- request a copy of an agreement under which Personal Data is transferred outside of the EEA, if any;
- object to decisions based solely on Automated Processing, including profiling (ADM), if any;
- prevent processing that is likely to cause damage or distress to the Data Subject or anyone else;
- be notified of a Personal Data Breach which is likely to result in high risk to their rights and freedoms;
- make a complaint to the supervisory authority the information commissioner's office; and
- In limited circumstances, receive or ask for their Personal Data to be transferred to a third party in a structured, commonly used and machine readable format.

You must verify the identity of an individual requesting data under any of the rights listed above (do not allow third parties to persuade you into disclosing Personal Data without proper authorisation).

**You must immediately forward any Data Subject request you receive to the DPM**

**Tritax Management LLP**, Standbrook House, 4th Floor, 2-5 Old Bond Street, London W1S 4PD  
**Company Registration No:** OC326500

## **ACCOUNTABILITY**

The data controller must implement appropriate technical and organisational measures in an effective manner, to ensure compliance with data protection principles. The Data Controller is responsible for, and must be able to demonstrate, compliance with the data protection principles.

- The Company must have adequate resources and controls in place to ensure and to document GDPR compliance including:
- Appointing an executive/committee accountable for data privacy – in our case this is the DPM
- Implementing Privacy by Design when Processing Personal Data and completing DPIAs where Processing presents a high risk to rights and freedoms of Data Subjects;
- Integrating data protection into internal documents including this Data Protection Policy, Related Policies, Privacy Notices or Fair Processing Notices;
- Regularly training Company Personnel on the GDPR, this Data Protection Policy and Related Policies and data protection matters. The Company must maintain a record of training attendance by Company Personnel; and
- Regularly testing the privacy measures implemented and conducting periodic reviews and audits to assess compliance, including using results of testing to demonstrate compliance improvement effort.

## **RECORD KEEPING**

The GDPR requires us to keep full and accurate records of all our data Processing activities.

You must keep and maintain accurate corporate records reflecting our Processing including records of Data Subjects' consents and procedures for obtaining consents.

These records should include, at a minimum, the name and contact details of the Data Controller and the DPM, clear descriptions of the Personal Data types, Data Subject types, Processing activities, Processing purposes, third-party recipients of the Personal Data, Personal Data storage locations, Personal Data transfers, the Personal Data's retention period and a description of the security measures in place.

## **TRAINING AND AUDIT**

You must undergo all mandatory data privacy related training and ensure your team participate in similar mandatory training.

You must regularly review all the systems and processes under your control to ensure they comply with this Data Protection Policy and check that adequate governance controls and resources are in place to ensure proper use and protection of Personal Data.

## **PRIVACY BY DESIGN AND DATA PROTECTION IMPACT ASSESSMENT (DPIA)**

We are required to implement Privacy by Design measures when Processing Personal Data by implementing appropriate technical and organisational measures (like Pseudonymisation) in an effective manner, to ensure compliance with data privacy principles.

In conjunction with the DPM, you must assess what Privacy by Design measures can be implemented on all programs/systems/processes that Process Personal Data by taking into account the following:

- the state of the art;
- the cost of implementation;
- the nature, scope, context and purposes of Processing; and
- the risks of varying likelihood and severity for rights and freedoms of Data Subjects posed by the Processing.
- Data controllers must also conduct DPIAs in respect to high risk Processing.
- you must speak to the DPM about conducting a DPIA when planning to implement major system or business change programs involving the processing of personal data including:
  - use of new technologies (programs, systems or processes), or changing technologies (programs, systems or processes);
  - Automated Processing including profiling and ADM;
  - Large scale processing of sensitive data; and
  - Large scale, systematic monitoring of a publicly accessible area.
- A DPIA must include
  - a description of the processing, its purposes and the Data Controllers legitimate interests if appropriate;
  - an assessment of the necessity and proportionality of the processing in relation to its purpose;
  - an assessment of the risk to individuals; and
  - The risk mitigation measures in place and demonstration of compliance.

### **AUTOMATED PROCESSING (INCLUDING PROFILING) AND AUTOMATED DECISION-MAKING**

Generally, ADM is prohibited when a decision has a legal or similar significant effect on an individual unless:

- a data subject has explicitly consented;
- the processing is authorised by law; or
- the processing is necessary for the performance of or entering into a contract.

If certain types of sensitive personal data are being processed, the grounds above will not be allowed but such sensitive personal data can be processed where it is necessary (unless less intrusive means can be used) for substantial public interest like fraud prevention.

If a decision is to be based solely on automated processing (including profiling), then Data Subjects must be informed when you first communicate with them of their right to object. This right must be explicitly brought to their attention and presented clearly and separately from other information. Further, suitable measures must be put in place to safeguard the Data Subject's rights and freedoms and legitimate interests.

We must also inform the Data Subject of the logic involved in the decision making or profiling, the significance and envisaged consequences and give the Data Subject the right to request human intervention, express their point of view or challenge the decision.

A DPIA must be carried out before any new Automated Processing (including profiling) or ADM activities are undertaken.

### **DIRECT MARKETING**

We are subject to certain rules and privacy laws when marketing to our customers.

For example, a Data Subject's prior consent is required for electronic direct marketing (for example, by email, text or automated calls). The limited exception for existing customers known as "soft opt in" allows organisations to send marketing texts or emails if they have obtained contact details in the course of a sale to that person, they are marketing similar products or services, and they gave the person an opportunity to opt out of marketing when first collecting the details and in every subsequent message.

The right to object to direct marketing must be explicitly offered to the Data Subject in an intelligible manner so that it is clearly distinguishable from other information.

A Data Subject's obligation to direct marketing must be promptly honoured, if a customer opts out at any time, their details should be suppressed as soon as possible. Suppression involves retaining just enough information to ensure that marketing preferences are respected in the future.

You must comply with any Company guidelines on direct marketing to customers.

### **SHARING PERSONAL DATA**

Generally, we are not allowed to share Personal Data with third parties unless certain safeguards and contractual arrangements have been put in place.

You may only share the Personal Data we hold with another employee, agent or representation of the Company if the recipient has a job-related need to know the information and the transfer complies with any applicable cross-border transfer restrictions.

You may only share the Personal Data we hold with third parties, such as our service providers if:

- they have a need to know the information for the purposes of providing the contracted services;
- sharing the Personal Data complies with the Privacy Notice provided to the Data Subject and, if required, the Data Subject's Consent has been obtained;
- the third party has agreed to comply with the required data security standards, policies and procedures and put adequate security measures in place;
- the transfer complies with any applicable cross border transfer restrictions; and
- a fully executed written contract that contains GDPR approved third party clauses has been obtained

Please refer to the DPM for further advice and appropriate clauses as required.

### **CHANGES TO THIS DATA PROTECTION POLICY**

We reserve the right to change this policy at any time without notice to you so please check back regularly to obtain the latest copy of this policy.

---

By signing this form, I, [EMPLOYEE NAME], acknowledge that on [date], I received and read a copy of the Company Data Protection Policy [DATED] and understand that I am responsible for knowing and abiding by its terms. I understand that the information in this Data Protection Policy is intended to help Company Personnel work together effectively on assigned job responsibilities and assist in the use and protection of Personal Data. This Data Protection Policy does not set terms or conditions of employment or form part of an employment contract.
